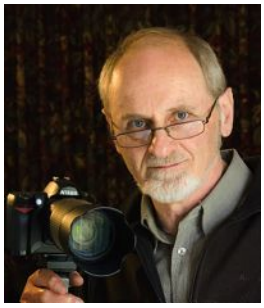
President's Message



Brien Cohn AFIAP, AAPS

This year has certainly been different.

Our 2020 digital salon was called off due to COVID-19 restrictions. When we gained approval for the 2021 salon, we thought COVID lockdowns would surely be over by the judging date in June. As the months passed, we became more and more concerned and eventually changed to remote judging to ensure a lockdown would not prevent the judging.

How lucky we were – our awards judging was done by Zoom conference right at the start of another lockdown.

On behalf of the VIGEX Committee of Management I thank all our salon entrants for their support. We congratulate all whose work has been accepted into the exhibition, particularly those who have received awards. I'm sure those attending our display will be impressed and hopefully inspired by the excellence of what they see.

We thank all our judges for the time they gave, and for their willingness to change to remote judging, which is more involved than the normal in-person method. We received 4266 images, about 600 more than for our last digital salon. 24% of these were accepted into the exhibition.

Next year our salon will be for prints only. We can't do that by remote judging – let's hope COVID lockdowns are over by then.

SALON JURY

Judge	Qualifications/ Honours	State	Monochrome Open	Colour Open	Nature	Creative	Travel	Differences in Society

Joseph Tam	GMPSA, SPSA, EFIAP/d3, APSEM/b	NSW		X		X	X	
Heather Prince	MAPS , EFIAP	VIC	Emergency Judge					

Salon Jury's Word

Max Lane

It was my pleasure and privilege to judge the Nature, Monochrome and Differences in Society sections. Awarded images in all these sections were of exceptional quality and my congratulations go to all the award winners.

This year it was necessary to use remote judging which was well organised by the VIGEX committee and proceeded flawlessly.

Nature: The standard of nature images reaches new heights each year with many images of an exceptional standard leading to extended discussion among the judges to select the awards. Many entries which although of high technical quality told a limited nature story, e.g. portraits of birds, reptiles, insects, mammals etc, which only present a descriptive story.
The Nature definition calls for the story telling value of the photograph to be weighed more than the pictorial quality while maintaining high technical quality. Images with a strong story based for example on behaviour, interaction of the same or different species and which also had excellent technical and compositional qualities scored well.

Monochrome: A very large number of images in this section, most of high quality, made it a difficult task for the Judges. A number of images with the usual subjects were approached in ways we have all become familiar with, while new approaches with a Wow factor and high quality stood out in such a large field.

Differences in Society: This is only the second time this section has been included.
There were some monochrome entries which were not accepted in this "colour only" section. Some entries with creative interpretations of this theme scored well and should provide a useful reference for entrants in future competitions.

Salon Jury's Word

Mario Mirabile, MAPS, EFIAP

I was very pleased to be invited to judge the Monochrome, Nature and Differences in Society sections of the 2021 VIGEX Digital Salon. Despite the near last-minute changes in the judging process necessitated by the ongoing COVID pandemic, the Committee are to be commended on succeeding in getting the salon completed on time.

The process of judging is never an easy one, whether it be a monthly club comp or an international. To put aside personal biases (or at least to attempt to….) and assess the merits of so many images, particularly in an open section such as Monochrome, is quite a challenge. Still, the stronger entries as always tend to stand out with many images demonstrating great craft and originality. When it came to sorting out the awards, while there was general consensus among the judges, it was clear that not everyone had exactly the same idea as to what constituted the stronger entries!

While the standard was generally high, it was disappointing to see that some entrants still fail to read or understand the requirements for each section, particularly in the Nature. There were many Nature entries which failed to meet the well published rules, which entrants would be well advised to read carefully, particularly the sections relating to allowable editing techniques. Entrants should also bear in mind that it's not just enough to produce a stunning animal portrait, as judges are directed to pay particular attention to the story-telling aspect of Nature images.

It's worth noting that the majority of awarded Nature images highlighted aspects of natural behaviour in addition to being very well photographed.

It was also disappointing to see many formulaic and clichéd themes trotted out in monochrome.

I'd also like to thank my fellow judges, Max and Gary. The session where we thrashed out the awards was both entertaining and educational.

Salon Jury's Word

Gary Smith

It was a privilege to be part of the 2021 VIGEX salon judges panel. When judging an international photographic competition, judges have an expectation of images that are sharp, where they need to be, well exposed and well edited; sadly there were a number of images that did not meet the basic standards with crooked horizons, dust spot and poor editing, these can be corrected simple within post processing. Having said that there were many exceptional images that were worthy of awards and I congratulate the entrants that not only achieved an award but also those that achieved an acceptance.

The Monochrome entrants in the main were of a high standard but many did not use a wide tonal range and so lost impact. In this section the judges were looking for something different that made us stop and spend time looking at the image.

The nature section was a very strong category and many images that gained an acceptance were also worthy of an award although they may not have gained one because of the strong competition. In this section a few entrants had not read or understood the subject definition.

The Differences in Society category was probably the most difficult for photographers as again the definition was not understood by many photographers as there was a number of images that showed a Different Society and not Differences IN Society.

When entering photographic competition please ensure that the definition is read and understood so that you will not be disappointed if a judge rejects an image for not meeting the definition.

Salon Jury's Word

Ian English EFIAP/g, GMAPS

It was my honour to judge three sections in the 2021 VIGEX Digital Salon - Open Colour, Creative and Travel.

There were some wonderful images for us to judge and I enjoyed seeing every image presented.

COLOUR

It is interesting that the list of images we had to select the awards from included a high percentage of images which were portraits, environmental portraits or at least had people in them.

I have always thought that landscape images have to be outstanding to compete with controlled lighting shots of people. Other genres such as macro, still life, nature etc. must also be outstanding to make the cut.

One word of advice is to avoid clichéd subjects as judges at this level have "seen it all before" and some types of images have been used many times by many photographers.

What entrants must note is that there should be a point of difference to make judges sit up and take notice.

CREATIVE

The first sentence of the Creative Definition for this competition is; "Creative means Altered Reality".

There were many fine images which did not show enough "altered reality" and consequently did not score highly.

The same thing goes for just using a filter to alter the image. This does not show enough intent to alter the image sufficiently.

A great creative image must not just show a high level of skill in compositing etc. but must also have a story or show meaning to why the image was created this way.

TRAVEL

The definition of Travel is occasionally revised to better focus attention on the essential characteristics of this area of photography and salon results are checked for compliance.
The judges were very aware of this selecting the awards and acceptances.

A very good example of this is a close up of a person or people with no evidence of the location. It could be a brilliant portrait image but not satisfy the rules.

There were also some images which had obviously been manipulated and were rejected as the definition precludes any cloning or adding elements.

Congratulations to all who entered and to all of the accepted and award winning photographers.

Salon Jury's Word

Margaret Metcalfe, EFIAP, FAPS

I deeply appreciated the VIGEX committee for allowing me the honour of judging the Creative, Travel & Open sections for 2021.
There was an overwhelming number of entries of so many different narratives, subjects and styles from all over the world.
The creative and open colour section is always a delight, a very strong entry with many of the images that tell a powerful, emotive, subtle or witty narrative with impact and skill.
The award winners had drama, story, impact and artistry. Congratulations to all the acceptance makers as these sections are always so strong with so many artistic objectives and personal styles.
Time constraints of judging an image requires us to make reactive considerations when scoring. The image needs to be virtually free of technical flaws that would distract from its essence and the story it tells, something that drives the viewer deeper and compels them to move around the image.
A great photograph and sure winner evokes a wow factor, a sense of wonder and admiration that returns with anticipation when the picture is viewed again and then kept in your mind for some time.
Travel section is always a challenge due to the time of day many images are taken.
The light is often hard and shadows strong, all while trying to capture a place of recognition or of a culture.
With little post processing allowed in this section, I would encourage entrants to go stronger to the narrative, if the light or time of the day is an issue, to be aware of the conditions and move around the light if possible.

Thank you for the opportunity.

Salon Jury's Word

Joseph Tam, GMPSA, SPSA, EFIAP/d3, APSEM/b

It has been my honor to be invited to judge three sections in Open Colour, Creative and Travel at the VIGEX Digital 2021. I congratulate those successful entrants in gaining their acceptances and awards in these sections. Your submissions were of a high standard both technically and with artistic applications.

Judging in this year is full of challenges due to the outbreak of pandemic that restricts inter-state travelling to Geelong to perform the usual physical judging. I was aware that not only we received more entries than expected in 2021 but also the interpretation of the PSA definitions in Travel section are quite involved.

Among the 465 images in the Creative section, there were plenty of clever ideas that use primarily photography with ingenious post processing skills to deliver a great story line. I believe the key in delivering a good piece of creative work is to have its originality and imagination with minimal assistance from software.

We have 1,099 images participated in the Open Color Section this year, many images were of exceptionally high quality and it was difficult for the Panel to determine which one was better than the others. Among the group of awarding images that judges have collectively selected, the Panel has to deliberate in great length on the strength and rationale of each of the awarding images before an award is assigned.

Although the Travel section has only 701 images but it has taken up the bulk of my judging time during the initial culling on images that didn't adhere to the PSA definitions.

Perhaps it is worth mentioning to the entrants of this section the importance of understanding and following the PSA definitions carefully. Consideration has been given on generic images of lakes, forests or beaches that do not provide some 'identifiable feature' or are not unique had scored 'low' in my initial culling process. Also, images from events arranged specifically for photography had been scored 'low' at the onset.

There has been a lot of discussions among Panel members at length during the Zoom meeting to determine if any awarding images follow the definitions given by the PSA.

Finally, I would like to say thank you to the VIGEX Committee members and volunteers for the additional administrative work they have performed successfully so that judges can comfortably carry out their judging duties remotely.
